

Class 9 – HTML Elements (5 Marks Answers)

Q1. What is HTML Text Formatting? What are the various formatting tags available in HTML?

Answer:

- **HTML Text Formatting** is used to change the appearance of text (bold, italic, underline, highlight, etc.).
- It helps to give importance and style to the content.
- **Formatting tags in HTML:**
 1. `<b>` – Bold text
 2. `<i>` – Italic text
 3. `<u>` – Underlined text
 4. `<strong>` – Important (bold) text
 5. `<em>` – Emphasized (italic) text
 6. `<mark>` – Highlighted text
 7. `<sup>` – Superscript (x²)
 8. `<sub>` – Subscript (H₂O)

Q2. What are the differences between HTML elements and tags?

Answer:

Tag

Element

A keyword enclosed in `< >`.

A complete structure: opening tag + content + closing tag.

Marks the start or end of an element.

Contains the content along with tags.

Example: `<p>` or `</p>`

Example: `<p>This is a paragraph.</p>`

Summary: Tag is just a part, while Element is the whole unit.

Q3. Name some common lists used when designing a page. Also explain them.

Answer:

Ordered List (`<ol>`) – Items are numbered.

```
<ol>
<li>HTML</li>
<li>CSS</li>
</ol>
```

1.

Unordered List (`<ul>`) – Items are bulleted.

```
<ul>
<li>Apple</li>
<li>Banana</li>
</ul>
```

2.

Definition List (`<dl>`) – Used for terms and definitions.

```
<dl>
<dt>HTML</dt>
<dd>HyperText Markup Language</dd>
</dl>
```

3.

Q4. Define Multimedia. Explain different components of Multimedia.

Answer:

- **Definition:** Multimedia is the combination of **text, graphics, audio, video, and animation** presented together interactively.
 - **Components of Multimedia:**
 1. **Text** – Basic way of presenting information.
 2. **Graphics** – Images, drawings, and charts.
 3. **Audio** – Sound, music, voice.
 4. **Video** – Moving pictures.
 5. **Animation** – Motion effects applied to graphics.
-

Q5. What are the differences between animation and video in multimedia?

Answer:

Animation	Video
Created using drawings, graphics, or computer effects.	Real-world recording captured using a camera.
Example: Cartoon movies	Example: A movie or live recording

Summary: Animation is artificial movement, while Video is real-life recording.

Q6. What is an HTML Form? Explain different HTML form tags with example.

Answer:

- **Definition:** HTML Form is used to **collect input from users** (name, email, password, etc.).
- **Common Form Tags:**
 1. `<form>` – Defines the form area.

2. `<input>` – Text, radio, checkbox, password, etc.
3. `<textarea>` – Multi-line text box.
4. `<select>` & `<option>` – Dropdown list.
5. `<button>` – Clickable button.

Example:

```
<form>
Name: <input type="text"><br>
Gender: <input type="radio" name="g">Male
       <input type="radio" name="g">Female<br>
       <input type="submit" value="Submit">
</form>
```

Q7. Write short notes on:

- a) **Headings** – HTML headings are written using `<h1>` to `<h6>`. `<h1>` is the largest, `<h6>` is the smallest.
- b) **Paragraphs** – Defined by `<p>`. Used to write text in block form.
- c) **Line Breaking** – `<br>` tag breaks text into a new line.
- d) **Horizontal Line** – `<hr>` draws a horizontal line across the page.
- e) **Tables** – `<table>`, `<tr>`, `<td>`, `<th>` used to display data in rows and columns.
- f) **Frames** – `<frameset>` and `<frame>` divide the browser window into sections (not used in HTML5).
- g) **Hyperlinks** – `<a href="url">Link</a>` used to link one page to another.
